
Sql2Plus is an IDE for the Oracle Database, with easy to use features and an easy to use graphical user interface. The intuitive user interface of Sql2Plus helps you quickly create SQL queries for your databases. The SQL Editor in Sql2Plus helps you type SQL queries and the code completion helps you to fill in missing parts of your SQL queries. By integrating the User Interface with Database Tools it is easy to find additional information about your tables, views, users and databases. Sql2Plus includes the features you need to quickly create SQL queries. When you want to run SQL queries on your database, you can right-click on the source code and choose Run. Sql2Plus also includes a SQL Editor where you can write your own SQL queries for your database. Sql2Plus is integrated with your database to provide additional information about your tables, views, users and databases. Integration with the database reduces the time you need to write the SQL queries. Sql2Plus is also designed to make your work easy and fun when you work with Oracle databases. This latest release introduces new features for editing tables and windows. This new feature helps you work with SQL scripts that are stored in your database. New feature: New menu item Database to find information about database management. Database type for each Database object has been changed to type. Tables, Views, User, Metadata and System tables can be selected and you can select the columns and the rows in the table, this information is shown in the Database Explorer in the left pane. SQL Server Database Objects, Connections and other objects are also displayed. SQL Server Database Objects shows you database objects that you have access to using a database user or role. Tables, Columns, Views, Users, Procedure, Sequence, Database and Object Views can be selected. The Rows, Values, and Columns of a Table are shown in the dialog for the selected object. The Data of a Table is shown in the dialog for the selected object. A new dialog window for the selected object is shown. You can now right-click on a SQL script to run it. Sql2Plus doesn't show you the results until you run a SQL script. SQL Editor: You can now add new columns and types to

Keyboard Macro Training gives you the ultimate power of customization when you practice your typing skills. The software allows you to record all the keystrokes you make, both as single keys or combinations of keys, and then play them back with desired keystrokes. You can customize each keystroke by changing: • Key pressed • Key combination • Macro name Keyboard Macro Training offers a clean and uncluttered interface, and allows you to enter the desired settings with the minimum of effort. The utility is offered as a portable application, and is not installed or installed in the Windows Registry. This means that it is designed to be run from any type of media, such as a USB flash drive or a CD/DVD. Keyboard Macro Training sports a simple and functional layout that allows you to select your desired settings, and customize them as you need. Keyboard Macro Training allows you to customize the macro settings with ease, and offers a number of different parameters, such as the number of keystrokes, keyboard layout, and a number of settings. When it comes to configuration options, the utility offers you the flexibility to choose the number of records (default is 10), the number of keys (default is all), and the number of steps in a single record (default is 10). You can also disable playback when the keystrokes are made, or decide whether to set the playback speed or not (it is recommended to select the "Playback speed" option). The application sports a simple and clean design that allows you to use the settings right away. What's more, you can check the statistics pane for detailed information about your current macro settings. This includes the total number of recorded steps, the total and average time of each recording session, the number of missing/wrong keys, and other information. You can check the current macro settings of any recorded session. After you click on the keystroke you want to test, the program will start recording, and when you complete a certain macro, you will be able to see the completed keystrokes in the statistics pane. Keyboard Macro Training is a lightweight application, so it doesn't place much burden on your computer resources. 9 Easy Ways to Convert Text Files to PDF Format 5.0 You can import a whole text document into the program and convert it to a PDF format, as well as simply select certain parts of the document.

Easy, convenient and fast to convert text files to PDF http://www.family-schneider.de/index.php?option=com_phocaguestbook&view=phocaguestbook&id=1&Itemid=55&9e2a2a5a4a886b2853197701499213cc=bd05d18593e51ca4dd90680b3c1b19de&t=12080
