

LDAPSoft AD Browser Crack [April-2022]

LDAPSoft AD Browser is a simple and reliable tool that allows you to easily access the Active Directory in a network. The program is designed to provide you with a read-only access to the Active Directory or a local or remote server. Effortless installation and usage LDAPSoft AD Browser takes a few seconds to install and allows you to easily configure the access to the network's Active Directory. You can view all the entries in the directory, view available attributes or run SQL-LDAP queries. It supports both V2 and V3 LDAP directories. The program can be installed both on local machines and on Domain Controller stations, plus it enables you to set the desired level of access security. You can create a connection, by specifying the hostname, desired port, SSL and the authentication details. The username and password can be inserted in the dedicated fields, to facilitate the connection start-up. The program allows you to manage both server and client certificates, plus set trusted certificates and keystores. Access and manage Active Directory contents LDAPSoft AD Browser features an intuitive interface, which allows you to explore the sub-directories of the AD, as well as view all the attributes and assigned values. For instance, you can easily manage People or Groups, in a given network. The tool displays the attributes of each object: classes and domain components, along with the assigned values, size and type. The Schema View reveals classes, types, rules, syntax and relevant metadata regarding each Active Directory. The SQL tab allows you to easily perform queries: you may select the command, the linker and source, then view the result. Support for several connections LDAPSoft AD Browser allows you to open each connection in a separate tab. You may activate several connections at the same time and manage them alternatively, by switching between tabs. The tool also integrates powerful searching engines, which allow you to find attributes in the Active Directory list, as well as pieces of text. n g o r d e r . 1 5 3 1 7 7 , 5 , - 1 , - 2 , - 3 , - 4 P u t 1 7 , 3 ,

What's New In?

LDAPSoft AD Browser is a simple and reliable tool that allows you to easily access the Active Directory in a network. The program is designed to provide you with a read-only access to the Active Directory or a local or remote server. LDAPSoft AD Browser Key Features: 1. Access AD Entries in a network The program allows you to open a connection to the Active Directory or a local or remote server. You can choose to view all the entries in the directory or a specific object type. You may manage the attributes and values of each entry. 2. Manage Active Directory attributes, values and count With the tool you can easily access the Active Directory and manage its attributes, values and count. You can view information about each entry, specify values, modify values, remove entries and even copy them. 3. Connect to AD using different protocols and servers LDAPSoft AD Browser allows you to connect to the AD using different protocols and servers. You can use SSLv2, SSLv3 or TLS. The access credential may be inserted manually or automatically, depending on the protocol. 4. Configure TLS and SSL protocols LDAPSoft AD Browser allows you to configure SSL and TLS protocols, which are required to connect to the AD or server. You can choose from the current protocols or create your own. 5. Manage access credentials LDAPSoft AD Browser features a dedicated window, which allows you to set user and password for authentication of connections. The program allows you to configure different connections with the use of different server and passwords. 6. Enable password regeneration LDAPSoft AD Browser facilitates Active Directory password regeneration. The feature allows you to set the program to automatically regenerate user or passwords, and help you prevent using the same passwords repeatedly. 7. Identify shared passwords LDAPSoft AD Browser allows you to identify shared passwords and allow access to a shared server. The feature may be activated in the program, or at the server level. 8. Manage SMTP certificates LDAPSoft AD Browser allows you to manage and set trusted SMTP certificates. You can use the tool to configure and set a server certificate. 9. Configure client and server certificates LDAPSoft AD Browser allows you to manage and configure server and client certificates. The program facilitates setting in a Certificate Trust Authority, as well as encrypting the connection between client and server. 10. Manage Keystores and certificates LDAPSoft AD Browser allows you to manage

System Requirements:

General Requirements: Processor: Intel® Pentium® 4 CPU (or greater) or AMD Athlon™ 64 CPU Memory: 4 GB RAM Hard Disk: 5 GB available space Graphics: 1024 x 768 resolution display Mouse: Microsoft compatible; ALT / CTRL key must be used DirectX Version: 9.0c Game Requirements: Chrome Browser: Vast applications (games) sometimes require extra power to handle them well.
