This is a powerful, yet easy to use macro. It provides a user interface which allows the creation of multiple macros and the combination of input and output. Efficiency: Due to the macro engine which has been built in, this macro is very fast and efficient. This

macro does not require a manual at all, allowing quick data input and high data output speeds. Capability: The macro can be used to generate multiple types of output files, such as HTML, Excel and CSV files. Key Features: Some of the main features that make this macro so efficient are the

following:

- Provides multiple macros
- Allows the combination of input and output
- Allows the creation of folders on the fly, when needed
- Allows macros to be moved to a different folder
- Allows macros to be named
- Allows macros to be named as needed
- Allows the definition

of a default macro · Allows macros to be created and edited · Allows macros to be used in a simple format · Allows the definition of a macro as a short cut · Allows users to define short cuts when needed · Provides the ability to define the number of variables · Allows users to define short

cuts in multiple locations .

Allows the creation of a macro for multiple file types . Allows the creation of a macro for multiple file types in the same folder . Allows the creation of a macro for multiple file types in multiple folders . Allows the combination of input and output . Allows the creation of

the various types of output files · Allows a user to open a file to edit and save it · Allows macros to be merged if needed · Allows macros to be merged if needed · Allows the user to export a macro to a plain text file · Allows the macro to be renamed · Allows the macro to be renamed as needed · Allows

the macro to be renamed with the user interface . Allows the user to select the position of the macro in a list . Allows the user to select the position of the macro in a list . Allows the user to drag and drop multiple macros to a different folder . Allows the user to drag and drop multiple macros to a

different folder · Allows the user to select multiple macros at once and add them to a file · Allows the user to select multiple macros at once and add them to a file · Allows the user to select multiple macros at once and create a folder of the selected macros · Allows the user to select multiple

macros at 80eaf3aba8

PDF Page Counter is a web-based PDF Report Generator designed to generate a detailed report about your PDF files.

What it does: PDF Page Counter is an ideal PDF report generator to generate a detailed report about your

PDF files. It is designed to make report generation as simple and as effortless as possible. • Generate PDF reports about all of your PDF files including keyword list, author, creator, modification dates, number of pages, producer, and titles. • Generate reports in both PDF and CSV

formats. PDFs can be saved as a PDF file or as an image file.

- PDF page counter is easy to use with no extensive skills required. The fields and the table layout can be easily configured.
- Include PDF field information about the PDF file including creation and modification dates,

number of pages, keywords, producer, creator, and author.

- Generate reports with documents from a local folder or from a website. The documents can be added either as a folder, a ZIP file, a link or a range of text.
- Generate both PDF and CSV reports.
- There is no need to install

additional software to generate the reports as PDF Page Counter generates them directly from the web. • You can drag and drop files or folders. All of the files or folders can be added to a report, including the password protected files. • PDF Page Counter is a web-based

software so there is no need to install or download software on your computer. • The reports can be saved to a local folder for further editing and printing. • This software is 100% free and there are no hidden costs. What it does not do: • Generate reports in DOCX, DOC, PPT, XLS, or

PPTX formats. • PDF Page Counter is designed to generate detailed reports about PDF files only. There is no support for HTML, JPEG, BMP, PNG, TIFF, PS, EPS, GIF, or PDF files. • PDF Page Counter is not an add-on for Acrobat, you cannot generate reports with Acrobat. • The

reports cannot be created with other software, such as Adobe Acrobat Pro. What is inside PDF Page Counter • It is designed to generate reports about PDF files only. • It is a web-based software so it is entirely dependent on the web connection. It works best with a stable and fast internet

connection. • It is designed to generate reports about PDF files

What's New in the PDF Page Counter?

Counter the pages of your PDFs with this handy little program. Counts the pages of any PDF file and allows you to save results for analysis. No

installations required. Borislav
